Dear Parents/Guardians:

Growing Strong Sexual Assault Center will be doing a presentation on Illinois's newest law to help bring sexual assault prevention awareness to our children. This is now a requirement of all public schools in Illinois known as **Erin's Law**.

All presentations are age appropriate and presented in a non-threatening way to empower children to know what to do when faced with an unhealthy or unwanted touch. There may also be handouts or giveaways for the students to bring home that will share more information about what they have learned.

The objectives of this presentation are as follows:

- Be able to identify unhealthy, hurtful, or confusing touch by another person
- Know how to set healthy boundaries with others
- Understand the difference between safe and unsafe secrets
- Define the importance of a support system
- Empower students to confide in trusted adults

If you would like any more information about Erin's Law, or other information regarding these programs, please feel free to contact us. We look forward to meeting with your students and are excited to facilitate these important conversations in their classroom!

Sincerely,
Growing Strong's Prevention Team
